Cisco CCNA in 60 Days by Paul William Browning does a good job explaining and presenting problems and solutions you might encounter in the magical world of Cisco - but this book is not for everyone, as you need a SOLID understanding of networking before you start reading this book (the book recommends CompTIA Network+ books as an introduction to networking.)

This is where Cisco CCNA in 60 Days can help. Devised by two industry experts and countless Cisco students just like you, the 60-day programme breaks down every exam requirement into a daily study task. All you need to do is open the book at the relevant day (from 1 to 60), read the theory, and complete the lab.

Gateway Load Balancing Protocol (GLBP) is a Cisco proprietary  
protocol and is a very special protocol because unlike the others,  
GLBP allows the load balancing of traffic among the master and  
standby routers. GLBP is considered a high-end feature and that means  
most Cisco switches and routers don't support GLBP.

This will only help you pass in 60 days if you do 60 days hard study. You take the full CCNA exam after 60 days or split it in two as the book says. The first 30 days are to set you up ready to take the ICND1 exam and the last 30 days to take the ICND2 exam or the full 60 days to take one exam (CCNA).
