What is a Standard? Simply stated, a standard is a document used repeatedly as a rule, guideline or definition. It is developed by a committee of experts who work within different areas of a particular industry – this ensures that the standard is well-rounded. All AWS standards are approved by the American National Standards Institute (ANSI).

Chart - NCETA

The British Standard 1710 Safety Colours are used in addition to the Basic Identification Colours. The basic colour, indicating the pipe contents, is shown on either side of the safety colour. For example, fire fighting water would have a band of green (water), a band of red (fire fighting), and then another band of green.

BS 1710 British Standard Pipe Marking | Graphic Products American Welding Society (AWS) Standards. The American Welding Society (AWS) publishes over 240 AWS-developed codes, recommended practices and guides which are written in accordance with American National Standards Institute (ANSI) practices. The following is a partial list of the more common publications:
