The new OPC Unified Architecture (OPC UA) unifies the existing standards and brings them to state-of-the-art technology using service-oriented architecture (SOA). Main advantages of the new standard are: Platform-independent technology allows the deployment of OPC UA beyond current OPC applications only running on Windows-based PC systems.

Overview. The OPC UA Online Reference is a searchable collection of specifications and information models. Information models are made available by publishing a index of types defined in the model as human readable tables. When possible the definition of a Type is linked to the appropriate section in the specification.
