Project Procurement Management: Contracting, Subcontracting, Teaming. Project Procurement Management. : Quentin W. Fleming. Project Management Institute, Jan 28, 2019 - Business & Economics - 276 pages. 0 Reviews. Not all project procurements are the same. Unless the project carefully makes an assessment of the items it will make, versus the items it will buy, and then adequately plans for these purchases, the risks of performance will increase.

Subcontracting is the practice of assigning, or outsourcing, part of the obligations and tasks under a contract to another party known as a subcontractor. Subcontracting is especially prevalent in...

Subcontracting Definition

The subcontracting procurement process is one of the most important issues impacting the costs of engineering projects and construction projects, in particular. Traditional procedures of subcontracting procurement tend to limit the opportunities for price negotiation and cooperative relationships between contractors and neglect potential issues such as engineering interface, construction risk, and waste.

This is the Subcontractor Management Plan, document number XYZ035, for the SYSTEM Z project. 1.2 Purpose. The Subcontractor Management Plan outlines the relationship between the XYZ Contractors in the SYSTEM Z project and the methods by which Company ABC, as the prime contractor, will assure the production of quality deliverables from each of its subcontractors and assure the development of long term business relationships between the Companies.

Sample Subcontractor Management Plan

Project procurements are simply sub-projects, which need to be managed well, not blindly delegated to an independent organization to buy for the project. Certain procurements, major complexity developments, creating something new, which does not exist, according to the project's unique specification, must be managed by the project team, and supported by the professional procurement organization.

Project Procurement Management: Contracting ...

This eLearning programme has been specifically developed by the ICE to broaden your understanding of procurement, contracts and project management. The course covers procurement methods, construction law and the most commonly used construction contracts, and a range of considerations for project planning and project management, such as supply chain set up and process mapping.
