Pulling is a fundamental human movement—and the pull-up is a powerful expression of that movement. The pull-up is executed by reaching up overhead with the arms to a stationary bar, grabbing on and “pulling up” the rest of the body until the chin is above the bar. The exercise uses the arm, shoulder, and upper back muscles.

*How to Do a Pull-up: The Ultimate Guide*

February 28, 2020. February 3, 2019. Pull-ups are one of the most fundamental bodyweight exercises but a large percentage of people cannot achieve a single unassisted pull-up. This can be off-putting for those who see the basic pull-up as a pre-requisite for a bodyweight workout and can be demotivating those who are unable to complete a single pull-up.
