A discussion guide is a set of questions/tasks/topics that you, the researcher, wish to walk a research participant through in order to reach your learning objectives. They will facilitate the...

[Creating an effective discussion guide for your User Research](#)

Discussion guides are useful for both the researcher and the client as both parties are able to clarify the amount of emphasis on each topic area and the flow of the interview. Often an essential part of the research process, discussion guides also work in building up researcher/client rapport, as the discussion guide acts as a reference tool and a solid foundation for the interview or group discussion to build upon, increasing confidence and trust for both parties.

Discussion Guide - Market Research Company: DJS Research

The objectives of your discussion section should include the following:
I. Reiterate the Research Problem/State the Major Findings. Briefly reiterate the research problem or problems you are investigating and the methods you used to investigate them, then move quickly to describe the major findings of the study.

8. The Discussion - Research Guides at University of ...

Also known as a topic guide, this is an outline of key issues and areas of questioning used to guide a qualitative interview or group discussion. Such guides vary greatly in level of detail and in how flexibly they are applied - some use 'discussion guide' to refer to a more structured and 'topic guide' to refer to a looser, more open form. In the 'cognitive' model of qualitative market research a very detailed guide may be applied consistently to every group or interview; in the 'conative' ...

how it relates to your literature review and research questions, and making an argument in support of your overall conclusion. There are many different ways to write this section, but you can focus your discussion around four key elements:

How to Write a Discussion Section | Checklist and Examples

Discussion A good article will restate the results again in plain language and state whether they are consistent with the expected findings. Do the authors overstate their findings? That is, if the results were inconsistent or small effect sizes, are the authors making too much of them?

Discussion - Research Guides at Queen's University

The theoretical framework you describe should guide your study throughout the paper. Be sure to always connect theory to the review of pertinent literature and to explain in the discussion part of your paper how the theoretical framework you chose supports analysis of the research problem or, if appropriate, how the theoretical framework was found to be inadequate in explaining the phenomenon you were investigating.
