Problems And Solutions

In this section we present a collection of solved statistics problem, with fairly complete solutions. Ideally you can use these problems to practice any statistics subject that you are in need of, for any practicing purpose, such as stats homework or tests. The collection contains solved statistic problems of various different areas in statistics, such as Descriptive Statistics, Confidence Intervals, Calculation of Normal Probabilities, Hypothesis Testing, Correlation and Regression, and ...

Statistics problems take on a wide range, from pie charts, bar graphs, means, and standard deviation to correlation, regression, confidence intervals, and hypothesis tests. To be successful, you need to be able to make connections between statistical ideas and statistical formulas. Through practice, you see what type of technique is required for a problem and why, as well as how to set up the problem, work it out, and make proper conclusions.

Actively solving practice problems is essential for learning probability. Strategic practice problems are organized by concept, to test and reinforce understanding of that concept. Homework problems usually do not say which concepts are involved, and often require combining several concepts. Each of the Strategic Practice documents here contains a set of strategic practice problems, solutions ...
